

Umar Junaedi

Senior IT Manager | Enterprise Systems | Digital Transformation | Infrastructure

Email: umarjunaedi@gmail.com | WhatsApp: [+62 812-2226-4053](tel:+62812-2226-4053) | [LinkedIn](#) | [Jobstreet](#) | [GitHub oemjoen](#) | [GitHub oemjoe](#)

Cimahi, West Java, Indonesia

Professional Summary

Technology leader working across strategy, product, and technical execution. With more than 20 years in IT and more than 10 years in leadership, I focus on systems that stay close to real operations: ERP, HRIS, FMS/WMS, infrastructure, integrations, automation, service reliability, and digital transformation across logistics, distribution, fleet, warehouse, and education.

Leadership & Strategy IT budgeting, work plans, KPI, vendor management, prioritization, governance, and cross-functional alignment.	Build & Integrate PHP, Laravel, CodeIgniter, JavaScript, React/React Native, REST API, MySQL/MariaDB, workflow automation.
Run & Improve Ubuntu Server, Apache/Nginx, Docker, monitoring, security, backups, incident and service management.	Enterprise Domains ERP, HRIS, FMS, WMS, procurement, finance, payroll, fleet, warehouse, distribution, education technology.

Professional Experience

Senior Information Technology Manager - PT Tirta Nusa Persada

Mar 2021 - Present

- Own annual IT budgeting, work planning, priorities, timetables, and team KPI management.
- Manage vendors, budget and work-plan monitoring, and day-to-day IT support operations.
- Lead ERP development for a logistics ecosystem, including GPS Tracking, WMS, Fuel Management, P2H, Tire Management, and Fleet Management.
- Connect user needs, business processes, data, and technology decisions, while contributing directly to system development when needed.

IT Manager - PT Sapta Sari Tama

Jan 2013 - Mar 2020

- Built integrated information systems for a pharmaceutical distribution company, replacing manual processes with tailored applications.
- Developed and integrated SST ERP, GPS Call Salesman, GPS Collector, SST BPOM-Kemenkes, SST APMITRA, SST GL, and HALLOBIDAN.
- Owned IT strategic planning, vendor management, major projects, budgets, priorities, standards, procedures, and performance.
- Coordinated priorities between IT and business departments and assessed resource adequacy.

Application Consultant, IT Analyst, Implementor & Support - PT Kontinum Era Artha, PT Victoria Care Indonesia, UJKS KOPPAS Tanah Abang, DPU DKI Jakarta

Earlier career

- Worked as Assistant Project Manager across system requirements, user requirements, project preparation, QA, implementation, and support.
 - Led application support scheduling, issue severity management, root-cause analysis, resolution, documentation, and reporting.
 - Built hands-on experience in implementation, QA/support, networking, financial software, databases/reporting, programming, installation, maintenance, and deployment.
-

Selected Delivery

[SiBK Online](#)

Multi-school counseling platform with student mapping, assessments, career-interest modules, and a foundation for continuous product development.

PHP, CodeIgniter, MySQL, Multi-tenant

[ERP TMS - Laravel Modernization](#)

Modernizing an enterprise transportation platform to PHP 8.2/Laravel 12 with Docker, Nginx, MariaDB, role-permission, approvals, auditing, procurement, finance, and operations modules.

Laravel 12, PHP 8.2, MariaDB, Docker, Nginx

[Tirta AI Data & System Analysis Dashboard](#)

Data and system analysis dashboard with AI-provider abstraction, executive summaries, Ask Data, database catalog, source-code analysis, health endpoints, and Docker baseline.

Laravel 13, Groq, Gemini, Ollama, Redis, Docker

[ERP / HRIS / FMS / WMS Ecosystem](#)

Integrated systems across sales, finance, payroll, fleet, warehouse, attendance, approvals, GPS tracking, and logistics/distribution operations.

ERP, HRIS, FMS, WMS, REST API, MariaDB

[WhatsApp Operations Gateway](#)

Conversational gateway for operational information, approval reminders, workflow automation, and API integrations.

n8n, WAHA, REST API, AI-ready

[Infrastructure & Reliability](#)

Linux server operations, Apache, Docker, deployment, service-availability monitoring, security, backups, and incident troubleshooting.

Ubuntu, Apache, Docker, Cloudflare, Monitoring, Security

Education & Core Competencies

Bachelor of Informatics - Universitas Tarumanagara, 1999-2005

Core: IT leadership, enterprise architecture, digital transformation, business process analysis, service management, operational systems. Technology: PHP, Laravel, CodeIgniter, JavaScript, React, React Native, MySQL, MariaDB, REST API, Ubuntu Server, Apache, Nginx, Docker, monitoring, security, n8n, AI integration.

Project Portfolio - 20 Projects

A consolidated project archive spanning enterprise systems, logistics, pharmaceutical distribution, accounting, mobile distribution, infrastructure, modernization, and AI.

01. Trucking Management System

Sep 2023 - Apr 2024 | PT Tirta Nusa Persada

Full-cycle TMS covering P2H, logbook, maintenance, spare-parts management, GPS API integration, and inbound/outbound operations.

Role: Project Manager & Developer **Technology:** Apache 2.0, Ubuntu Server 16.04, PHP 7.0, CodeIgniter 3, MySQL 5.6, Android/PWA

02. Warehouse & Stuffing Management System

Jan 2022 - Mar 2022 | PT Tirta Nusa Persada

Full-cycle WMS covering trucking and tracking capabilities.

Role: Project Manager & Developer **Technology:** Apache 2.0, Ubuntu Server 16.04, PHP 7.0, CodeIgniter 3, MySQL 5.6, Android/PWA

03. Take Over Vendor ERP System into In-House Development

Jun 2021 - Dec 2021 | PT Tirta Nusa Persada

Took over the full development lifecycle from a vendor into an in-house team and built new modules including GPS Tracking and Fuel Management.

Role: Project Manager & Developer **Technology:** Apache 2.0, Ubuntu Server 16.04, PHP 7.0, CodeIgniter 3, MySQL 5.6

04. System Koperasi Talas Beneng

Jan 2020 - Jun 2020 | Consignment & Inventory

Application for consignment sales processes and stock balance management.

Role: Project Manager & Final QA **Technology:** Apache 2.0, PHP 7.0, CodeIgniter 3, MySQL 5.6

05. SST HALLOBIDAN

Jan 2018 - Jun 2018 | PT Sapta Sari Tama

Direct-sales application for clients and users, particularly midwives and doctors.

Role: Project Manager & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6, React Native

06. SST GL Distribusi

Oct 2017 - Mar 2018 | PT Sapta Sari Tama

Accounting, profit and loss, balance sheet, journal ledger, manual journal, and related modules.

Role: Project Manager & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6

07. SST ERP Distribusi

Jan 2015 - Oct 2017 | PT Sapta Sari Tama

Migrated a service-company application into an in-house platform with customization, automation, and full-cycle distribution capabilities.

Role: Project Manager & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6

08. SST APMITRA

Sep 2016 - Mar 2017 | PT Sapta Sari Tama

ERP/POS application for partner pharmacies.

Role: Project Manager, Developer & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6

09. SST GPS COLLECTOR

Jan 2016 - Jul 2016 | PT Sapta Sari Tama

Direct billing and collection application for salesmen and collectors.

Role: Project Manager & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6, React Native

10. SST GPS CALL SALESMAN

Jun 2015 - Dec 2015 | PT Sapta Sari Tama

Direct-sales application for sales teams.

Role: Project Manager & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6, React Native

11. SST BPOM KEMENKES

Jul 2015 | PT Sapta Sari Tama

Reporting application for the Ministry of Health and BPOM covering pharmaceutical product flows.

Role: Project Manager, Developer & Final QA **Technology:** PHP 7.0, CodeIgniter 3, MySQL 5.6

12. SST ERP Distribusi with ZOHO

May 2013 - May 2014 | PT Sapta Sari Tama

Full-cycle distribution covering purchasing, stock, AR, AP, accounting, route, customized pricing, and incentives.

Role: Project Manager, Developer & Final QA **Technology:** Zoho Creator

13. 3S DISTRIBUTION APPS

Date not listed | PT Victoria Care Indonesia

Business analysis, assessment, project requirements, user requirements, QA/UAT, and implementation.

Role: Business Analysis / QA / Implementation **Technology:** PHP, Apache, MySQL, Ubuntu

14. BosNet & moDis GULAKU

Date not listed | PT Kontinum Era Artha

Business analysis, client assessment, project requirements, user requirements, QA, and implementation.

Role: Assistant Project / Application Consultant **Technology:** C#, ASP.NET, SQL Server 2008, Windows Server 2008 R2

15. BosNet DIMA

Date not listed | PT Kontinum Era Artha

Created price and accounting modules, conducted client assessments, gathered project and user requirements, QA, and implementation.

Role: Application Consultant **Technology:** C#, ASP.NET, SQL Server 2008, Windows Server 2008 R2

16. SIMKOPERASI

Date not listed | UJKS KOPPAS Tanah Abang

Client assessment, QA, and implementation.

Role: Implementation / QA **Technology:** Visual Basic, MS Access, MySQL, Windows Server

17. SIMYANTEK

Date not listed | DPU DKI Jakarta

Client assessment and application development.

Role: Programmer / Implementor **Technology:** Visual Basic, SQL Server, Windows Server

18. moDis Mayora - Mobile Distribution

Date not listed | PT Kontinum Era Artha

Client assessment, QA, and implementation for a mobile distribution application.

Role: Application Consultant **Technology:** VB.NET, SOTI, Windows Mobile, RFID

19. ERP TMS - Laravel Modernization

Current | GitHub: [oemjoe/tms-erp-php82](#)

Modernization of a transportation ERP/TMS to PHP 8.2 and Laravel 12, covering P2H, mechanical inspection, maintenance, procurement, purchase orders, finance, invoicing, approval flows, PDF/Excel exports, QR codes, audit trails, Docker, and staging deployment.

Role: Project / System Modernization **Technology:** Laravel 12, PHP 8.2, MariaDB, Docker, Nginx, Tailwind CSS 4

20. Tirta AI Data & System Analysis Dashboard

Current | GitHub: [oemjoe/ai-dashboard](#)

Laravel platform for centralized data and system analysis, executive summaries, Ask Data, database cataloging, source-code analysis, health endpoints, roles/permissions, and AI-provider abstraction for Groq, Gemini, and Ollama.

Role: Architecture / Development **Technology:** Laravel 13, AI, Groq, Gemini, Ollama, Redis, Docker
