| tahun IT | tahun memimpin | Enterprise Systems     | Infrastructure & Reliability |

## Profil

Peran saya berada di antara strategi, produk, dan eksekusi teknis. Saya membantu organisasi memetakan proses, memilih pendekatan, membangun solusi, lalu memastikan sistem dapat dipakai sehari-hari dan terus ditingkatkan.

|                                                                                                             |                                                                                                                               |
|-------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>Direction</b><br>IT strategy, annual budgeting, work plans, priorities, KPI, vendor management.          | <b>Delivery</b><br>Enterprise applications, PHP/Laravel/CI, REST API, mobile/web integration, automation.                     |
| <b>Reliability</b><br>Linux servers, Apache/Nginx, Docker, monitoring, security, backup, incident response. | <b>Transformation</b><br>Process mapping, modernization, in-house development, AI/data exploration, multi-system integration. |

## Karier Ringkas

### Senior Information Technology Manager

PT Tirta Nusa Persada | Mar 2021 - Sekarang

Menyusun anggaran tahunan, rencana kerja, prioritas, timetable, dan KPI tim IT.

### IT Manager

PT Sapta Sari Tama | Jan 2013 - Mar 2020

Membangun sistem informasi terintegrasi untuk perusahaan farmasi dari proses manual menjadi aplikasi yang disesuaikan dengan kebutuhan bisnis.

### Application Consultant, IT Analyst, Implementor & Support

PT Kontinum Era Artha, PT Victoria Care Indonesia, UJKS KOPPAS Tanah Abang, DPU DKI Jakarta | Sebelumnya

Assistant Project Manager untuk system requirements, user requirements, project preparation, QA, implementasi, dan support.

# Karya Terpilih

Contoh karya lintas enterprise operation, education technology, automation, modernisasi, AI, dan infrastruktur.

## 01. SiBK Online

Platform bimbingan dan konseling sekolah multi-school dengan modul pemetaan siswa, assessment, minat-karier, dan fondasi pengembangan produk berkelanjutan.

PHP, CodeIgniter, MySQL, Multi-tenant

## 02. ERP TMS - Laravel Modernization

Modernisasi sistem transportasi enterprise ke PHP 8.2/Laravel 12 dengan Docker, Nginx, MariaDB, role-permission, approval, audit, procurement, finance, dan operational modules.

Laravel 12, PHP 8.2, MariaDB, Docker, Nginx

## 03. Tirta AI Data & System Analysis Dashboard

Dashboard analisis data/sistem dengan AI-provider abstraction, executive summary, Ask Data, database catalog, source-code analysis, health endpoints, dan Docker baseline.

Laravel 13, Groq, Gemini, Ollama, Redis, Docker

## 04. ERP / HRIS / FMS / WMS Ecosystem

Integrasi sistem untuk sales, finance, payroll, fleet, warehouse, attendance, approval, GPS tracking, dan operasi distribusi/logistik.

ERP, HRIS, FMS, WMS, REST API, MariaDB

## 05. WhatsApp Operations Gateway

Gateway percakapan untuk akses informasi operasional, reminder approval, workflow automation, dan integrasi API.

n8n, WAHA, REST API, AI-ready

## 06. Infrastructure & Reliability

Operasional server Linux, Apache, Docker, deployment, monitoring service availability, security, backup, dan incident troubleshooting.

Ubuntu, Apache, Docker, Cloudflare, Monitoring, Security

## Cara Kerja

|                                                                                                                |                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Understand</b><br><br>Memahami proses bisnis, pain point, data, user, risiko, dan kebutuhan operasional. | <b>2. Design</b><br><br>Menentukan arsitektur, integrasi, prioritas, standar keamanan, dan delivery plan.                      |
| <b>3. Build</b><br><br>Membangun atau memodernisasi aplikasi, API, workflow, deployment, dan dokumentasi.      | <b>4. Run &amp; Improve</b><br><br>Monitoring, troubleshooting, support, feedback loop, hardening, dan continuous improvement. |

## Technology & Domains

PHP, Laravel, CodeIgniter, JavaScript, React, React Native, REST API, MySQL, MariaDB, Ubuntu Server, Apache, Nginx, Docker, Cloudflare, n8n, monitoring, security, AI provider integration (Groq/Gemini/Ollama), Redis.

ERP, HRIS, FMS/WMS, fleet, trucking, warehouse, finance, procurement, payroll, attendance, pharmaceutical distribution, education technology, system analysis, data analysis, automation.
